WELCOME TO SCOJO NEW YORK

Luxury Reading Eyewear

SCOJO®
NEW YORK

Our SCOJO New York's collection of luxury eyewear is inspired by the confident and contemporary style of New York City. Our designers construct cutting edge and vibrant styles so your personality can shine. We use the finest materials to enhance your overall experience resulting in a supreme comfort level while reading.

We are dedicated to enhancing your customer's reading experience. Sooth your reading struggles and try our luxury quality optical grade lenses and BluLite protection for the ultimate leisure experience.

Our lens clarity sets us apart from our competitors as there is no warping or waves in the middle of our lenses. Most people who try our lenses for the first time find that they are about half a power lower than what they're been purchasing at the drugstore.

Our lenses are acrylic, shatter resistant, and meticulously quality checked in three different stages to ensure perfect lens quality.

“

BEST GLASSES

I have been using reading glasses for years, and these are the most comfortable, effective and best looking glasses I have ever found. The only ones I will ever own. Highly recommended.

JOHN

Happy SCOJO Customer

SCOJO®
NEW YORK

“

DEFINITELY RECOMMEND!

I love these reading glasses! They are lightweight, comfortable, stylish and practically indestructible. I have been rather careless with them. My 75 pound dog has slept on them, they have survived a few hours in the back pocket of my jeans... still in perfect shape. I repurchased them because I lost a pair and to try a new color. Definitely recommend!

MONICA

GELS ORIGINAL COLLECTION

Luxury Reading Eyewear

SCOJO®
NEW YORK

Crafted for comfort, our classic Gels collection provides a selection of sleek, ready-to-wear styles. Durable, lightweight and our original top seller.

High-quality reading lenses with beveled edges to prevent edge chipping.

Hard coating is applied to the lenses to protect the lens from scratching easily.

Drill mount holes are cut cleanly and precisely with the most advanced CNC technology cutting machine to prevent the lens from cracking and crazing. The hole is then lined with a protective bushing that encapsulates it and offers an extra measure of protection against cracking.

TR90 material is a surgical grade plastic that ensures the highest performance of durability and flexibility in the material.

GELS MANHATTAN COLLECTION

Luxury Reading Eyewear

SCOJO®
NEW YORK

This frame is the talk of the town. A smart and sophisticated reading glass, the Gels Manhattan is a flattering unisex silhouette style.

The Gels Manhattan is refined, lightweight, and flexible. A soft matte texture, embellished with working rivets for added style and functionality, completes this design.

Crafted from TR90, this material is a surgical grade plastic that ensures the highest performance of durability and flexibility in the material.

Our lenses are acrylic, shatter resistant, and meticulously quality checked in three different stages to ensure perfect lens quality.

TRIBECA COLLECTION

Luxury Reading Eyewear

SCOJO®
NEW YORK

Tribeca collection is fashion forward and offers a myriad of inventive shapes, patterns and color palettes inspired by the New York City lifestyle.

All our Tribecas are made from high quality acetate and are handmade optical quality frames. They are finished with the same tumbling and polishing process we use on our optical frames.

This collection is based on the individuality that makes this community whole. We highlight the passion for life and the uniqueness of each individual in every one of our exclusive designs.

Our Tribecas have a V-shape bevel, unlike the traditional square-shape bevel for most reading glasses, that allows any prescription to sit securely within our Tribeca frames.

Our lenses are acrylic, shatter resistant, and meticulously quality checked in three different stages to ensure perfect lens quality.

BLULITE COLLECTION

Luxury Reading Eyewear

SCOJO®
NEW YORK

Through blue light filtering technology, fashion meets function with our latest BluLite styles. Optical grade lenses provide crystal-clear clarity.

The blue light filters limit the amount of blue light allowed to pass through the lens. This is based on isolating the spectrum range where blue light exists and blocking/filtering those wavelengths out while letting all other wavelengths of visible light through.

Our BluLite technology is cast within our lens and cannot be scratched off.

The lenses transmit 60% at the 400-420 range, 75% at the 430-460 range and 80% at the 465-500 wavelength ranges.

Our lenses are acrylic, shatter resistant, and meticulously quality checked in three different stages to ensure perfect lens quality.
